01 Introduction
KF7046 Computer Network Implementation

David Kendall

Northumbria University

Introduction to the module

- Module has 2 main aims:
  1. Develop practical skills in computer network implementation using Linux
     - VM-based lab work
  2. Develop research skills in computer network implementation
     - Read and review classic and current papers from the networking literature
- Review the module home page at http://fee.northumbria.ac.uk/staff/cgdk2/Teaching/KF7046/

Introduction to the labs

- Lab environment
- Virtualbox
